SVU CATERS TO THE SILICON VALLEY HIGH TECH INDUSTRY

Master of Science in Computer Science

The MSCS program provides students with a strong theoretical background and practical experience in keeping current with the high tech trends and state-of-the-art technologies in Silicon Valley. Special topics are offered to introduce the latest developments and issues in both academic research and industry application areas. State-of-the-art hardware equipment and software tools currently used by most companies in Silicon Valley are used in this program.

Delivery of Instruction

SVU offers a hybrid mode of instruction for the MSCS program. The hybrid mode of delivery combines live online instructions and onsite instructions for the class.

Online instructions are offered live through a Learning Management System utilizing ZOOM Education Platform. Students and instructors meet together at the same time to communicate with voice, video, and whiteboard.

Onsite instructions are face-to-face interactions, with the instructor in the room with the students.
